

**Thank you for purchasing a Mustard Bikes Fender Eliminator.
The following is a brief guide for installation of your
14- Kawasaki Z1000 Fender Eliminator.**

1. Remove rider seat followed by the pillion seat.
2. Remove 2 x bolts from right rear seat cowling (4mm Allen key).
3. Gently pry back the front of the seat cowl and right tank infill panel until they pop from the rubber grommets.
4. Remove right rear seat cowling (two moulded clips hold the panel and the undertray together).
5. Undo indicator and number plate light plugs (located under the subframe on the right hand side).
6. Remove 4 x bolts and 2 x phillips head screws from the rear fender (5mm Allen key) and remove.
7. Remove reflector (8mm spanner) and 2 x phillips head screws from the side of the stock fender.
8. Remove indicators from stock fender and fit to Fender eliminator.
9. Fit fender eliminator to bike using hardware provided and two of the OEM bolts.
10. Plug in wiring and check for correct operation. The LED bolt is polarity sensitive. If it does not light up switch the wires around and check again.
11. Refit right rear seat cowling and seats following the reverse process of removal

If you have any problems with installation feel free to contact us at help@mustardbikes.com for any queries.
We will be more than happy to help in any way we can.
